Food and Events Ideas

Idea 1

Be Eco-conscious in Street Food Operations or Events

Use eco-friendly, compostable utensils and containers to reduce waste. Encourage guests and vendors to avoid and recycle plastic.

Idea 2

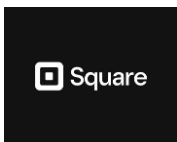

Arrange Farm-to-Table Experiences

Arrange tours with local farmers to showcase sustainable practices and end with a tree-planting activity or composting lesson.

Tools Make It Easier!

Ko-fi helps all kinds of foodies, creators, artists, and streamers make an income. You can accept tips, set up memberships, take requests and sell your work—all in one place. If for example, your eco-health business wants to accept donations or offer souvenirs (such as locally crafted items) for sale to support its eco-tourism efforts, Ko-fi offers a straightforward platform. Artisans can sell small items or accept payments with minimal fees. <https://ko-fi.com/>

Square is a versatile point-of-sale solution ideal for GRASSROOTS eco-health food entrepreneurs. It allows artisans to accept card payments on-site at workshops, markets, or events, making it easy to sell eco-friendly souvenirs and products. Square also offers inventory management tools, enabling businesses to track stock of locally crafted or sustainable items. <https://squareup.com/ie/en>

Trello: Organise the planning stages for your eco-health food events, workshops, and partnerships with local artisans. You can assign tasks, set deadlines, and track progress, ensuring everything from route planning to artisan partnerships runs smoothly. <https://trello.com/>

Food and Events Tools Make It Easier!

	<p>Earth Hero is a valuable app for GRASSROOTS eco-health tourism initiatives, helping participants understand and track their environmental impact. The app suggests actionable steps to reduce carbon footprints, making it an excellent tool for workshops or community programs focused on sustainability. By using Earth Hero, eco-tourism entrepreneurs can encourage participants to adopt greener practices and actively engage in reducing their environmental impact. https://earthhero.com/</p>
	<p>Olio is the app for finding what you need and sharing what you don't with local people. If you want to reduce food waste during farm-to-table or street food events, OLIO connects users with local people to share surplus food. This can be valuable for avoiding waste at the end of events. https://olioapp.com/en/</p>
	<p>Too Good To Go: This app helps prevent food waste by allowing local vendors to sell surplus food at a discount. Great for food events, it connects participants with eco-conscious local vendors. https://www.toogoodtogo.com/en-ie/</p>
	<p>EcoCounter: If you're hosting multiple events or looking to track visitor numbers, EcoCounter can help you estimate foot traffic and evaluate the environmental footprint of your activities. This is helpful for planning and managing resources effectively. https://www.eco-counter.com/</p>
